

IRCOIT

DESIGN | DEVELOPMENT | PROMOTIONS

WHO WE ARE

We do things better

We are a result oriented company helping global businesses to convert their physical into digital business running 24X7.

OUR SERVICES

We do things better

Web Development & optimization

We are expertise in building brand new website and API with PHP, Laravel, wordpress, java, shopify, woocommerce, magento, and custom code.

Custom Software and mobile App Development

We provide responsive applications, either iOS/Android with and without API, all we deliver is good quality products that helps business running.

Digital solutions & promotions

We help companies to build a professional brand, logo, website, graphics and SEO/SMM/SEM/PPC to promote their business globally.

MISSION

To connect small, medium and large scale enterprises to fulfil their software and digital needs.

VISION

To become an iconic brand leading IT sector

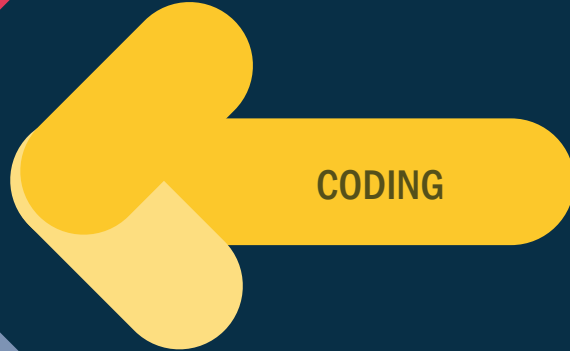

PLANNING

We understand the business, create proper plan using concept and designs

We have unhackable unique coding skill to develop the apps.

CODING

We compile digital codes through multiple loops and algorithm to understand future bugs if any.

EXECUTION

Once the execution happened, now its time to get the product live on server.

LIVE

OUR CREATIVE PROCESS

We do things better

We have multiple processes and plans to from research, development, compilation, execution and go to market strategy.

Cost?

We focus on win-win situation

Our pricing models are very simple to understand since we are very much open to have benefits on behalf of client. We also help client to cut-off unnecessary expenses may create a huge burden someday.

Global Operations

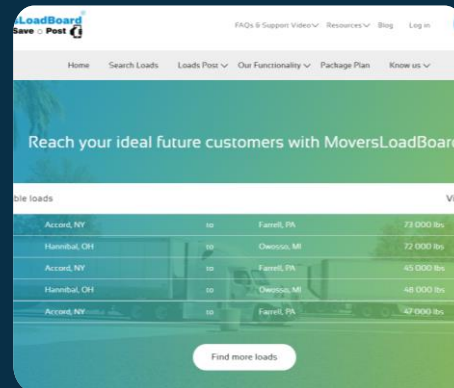

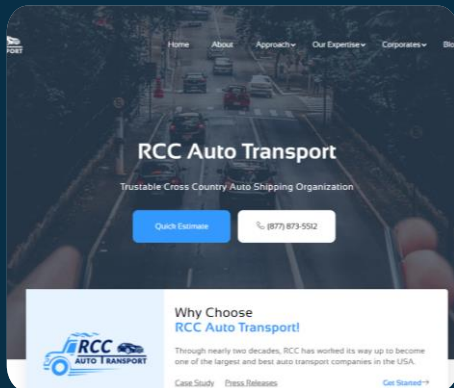

We founded our company IRCOIT in year 2016, and later created a corporate office in United States, and now we have 4 different offices and soon planning to setup two more branches in London and Australia.

Our Portfolio

We have delivered 500+ projects including web solutions, optimization, graphic designs, logos, templates, iOS applications, Android applications, Custom software solutions and few plugins and APIs.
